PROFILE

Information Systems student at Universitas Klabat (GPA 3.96/4.00) and full-stack developer intern at LLDIKTI Wilayah XVI, building the agency's personnel (SIMPEG) and performance accountability (SAKIP) systems with Laravel, React and PostgreSQL while acting as the team's code reviewer and merge gate. I also build AI-powered web and mobile apps with Google Gemini; my team won **Best Technical Excellence** (Mobile Application) at the Proxocoris International Competition 2026.

EXPERIENCE

Full-Stack Developer (Internship) · LLDIKTI Wilayah XVI — Jun 2026 – Present · Gorontalo, Remote

- Designed and developed two institutional web applications for civil-service administration (SIMPEG) and performance accountability (SAKIP), moving from frontend developer and code reviewer to full-stack.
- Served as SIMPEG's merge gate: **reviewed 80 pull requests and merged 81 of 180** (the most on the team), alongside 186 commits of my own.
- SIMPEG: built the reusable Blade component library and the Head of Division dashboard, hardened the batch employee import and session security, and built a fail-closed WhatsApp Business notification dispatcher, each with tests.
- SAKIP: delivered **12 pull requests (10 merged, about 31,000 lines)** across Laravel, React/TypeScript and tests: performance agreements, evidence fulfilment, activity planning, budgets (RAB) and period roll-over.

Web Developer · UVICS (UNKLAB Virtue in Computer Science) — Aug 2024 – Aug 2025 · North Minahasa, Hybrid

- Member of the website development division: built and maintained the organisation's web platforms with React, Next.js and Tailwind CSS, working with Git and code review in a cross-functional team.

KEY PROJECTS

SIMPEG · Sistem Informasi Manajemen Kepegawaian — Laravel, PostgreSQL, Keycloak SSO, queues & notifications

- Early-warning alerts (email and in-app) for promotions, salary increments (KGB) and retirement; multi-tier leave approvals with automatic balances; append-only career history, full audit logs, ASN Professionalism Index (IP-ASN) calculator and a 20-hour annual training tracker.

SAKIP · Sistem Akuntabilitas Kinerja Instansi Pemerintah — Laravel, React 19 + TypeScript, Inertia.js, PostgreSQL, Keycloak OIDC

- Performance-accountability cycle following Permenpan RB: strategic plans and cascading KPIs (IKU), quarterly measurement, LAKIP reporting and internal evaluation; 4-stage verification (Draft → Submitted → Verified → Approved) with mandatory evidence, AKIP predicate scoring (AA to D) and PDDikti API sync.

Interview AI · interview-ai-id.vercel.app — Next.js, Gemini Live API, React Three Fiber, Supabase

- Students practise requirements interviews by voice with six real-time 3D AI clients who hide key facts until asked precisely; the AI grades each transcript against a rubric for teachers. Live in production.

DailyBoost AI · AI money-management app — React Native, Expo, Convex, Gemini API

- Logs spending by voice or receipt photo, tracks budgets and savings goals, and answers questions through an AI advisor that reads the user's own data, synced in real time across devices.

More projects, including Carta AI, Klinik Sentosa and KostFinder UNKLAB, at **adrielwalintukan.my.id**

EDUCATION

Universitas Klabat (UNKLAB) · Bachelor of Information Systems · GPA 3.96 / 4.00 — 2023 – 2027 (expected)

TECHNICAL SKILLS

Languages	PHP, TypeScript, JavaScript, Python, SQL
Backend	Laravel, FastAPI, Node.js, REST APIs, queues & background jobs, Keycloak SSO/OIDC
Frontend & Mobile	React, Next.js, React Native (Expo), Inertia.js, Blade + Alpine.js, Tailwind CSS
Data, Cloud & AI	PostgreSQL, Supabase, Convex, SQLite, AWS fundamentals, Google Gemini (incl. Live API)
Quality & Tools	Software testing (PHPUnit/Pest, Vitest), PHPStan, Git & GitHub code review, Podman/Docker, Figma

HONORS & CERTIFICATIONS

Best Technical Excellence, Mobile Application Category · Proxocoris International Competition 2026 (team JAT)

Cloud Computing & Gen AI Basics on AWS	Dicoding, 2026	**Code Generation with IBM Granite**	IBM SkillsBuild, 2025
Spec-Driven Development with Kiro	Dicoding, 2026	**Generative AI for Software Development**	IBM SkillsBuild, 2025
AI Fluency: Framework & Foundations	Anthropic, 2026	**Introduction to Front End Development**	Simplilearn, 2025
Introduction to Cybersecurity	Cisco, 2026	**CISSP Security Assessment & Testing**	Simplilearn, 2025
